Business support that will escalate your success

Dates: 9th, 10th & 14th February 2017

Locations: Rose & Crown Hotel, Salisbury (9th & 10th) and
University of Southampton Science Park (14th)

SETsquared alongside the Wessex Academic Health Science Network is committed to providing comprehensive business support to healthcare and life sciences start-ups throughout their lifecycle.

The programme of support begins with the Health Innovation Programme. This is an immersive and interactive 3-day training course where you will develop your business idea, analyse your market and potential customers, develop a compelling pitch and look at funding strategies. It culminates with the opportunity to pitch to a panel of investors and healthcare experts, who will provide invaluable feedback for you to take your business forward. Participation in this event is free of charge and supported by the AHSN.

Following on from this, there will then opportunities to take part in specialist surgeries, events at which you can gain access to experts in the NHS, business mentoring and investment showcases.
